

BUGS TRAP (PU-198)

42-2 SEONPYUNGRI, SEOMYUN, SUNCHON, JEONNAM, KOREA

Tel: +82-61-759-5193 Fax: +82-61-755-7700 Email: nicolas@paru.co.kr

Of ways to catch harmful insects, Paru's innovative PU-198 is the better one that adopts luring lamps, electric motor and powerful fan. This is a very environment friendly product that does not spray harmful chemical but use physiological reaction of flying insects against specific wavelength with blue and green lamps. Two lamps lure flying insects i.e. moths, mosquitoes around powerful fan and draw them into trap. Wavelength reaches around 60m diameter which is equivalent to 2,800sqm coverage.

		<p>Outdoor waterproof electric motor IP50 waterproof rate</p>
<p>Livestock shed</p>	<p>Orchard farm</p>	<p>Height controllable mounting stand Maximum 2.5m</p>
		<p>Powerful suction with specially designed fan blade</p>
<p>Lake, Resort, riverside, etc.</p>	<p>Residential & Commercial building</p>	<p>Lighting & Trapping Dual functions at night time</p>
		<p>Decorative design matches any places.</p>
		<p>Control up to ten (10) units</p>

※ TECHNICAL SPECIFICATIONS

Bugs trap at **Horti Fair 2005**: Innovations focus

Dimensions	440 x 440 x 360 (mm)
Voltage / Frequency	on demand
Power consumption	170W
Fan motor	130W
Lamp (blue, green)	40W (20W / lamp)
Fan motor	1,650rpm @ 60Hz
Water proof level	IP50
Fan blade	350mm diameter (steel)
